I. INTRODUCTION

Sufism is a system of belief in which Muslims seek spiritual knowledge through direct personal experience of Allah Almighty. It is based upon mystical diemensions of Islam. Person who practice the belief system of sufism is called "Sufi". Emin (2008)

Sufi tradition simply cannot be acquated with mysticism. Sufism includes many different practice regimes and their supporting social institutions, arts and scholarly justifications. The Sufi teacher has great piety and an especially powerful sense of God's presence. Zubari (2002)

four stages. The first stage involves learning the goodness and moral values of all religions which are accomplished by studying Islam. Non Islamic Sufis rely on other religions or the writings of Sufi saints to set up the foundations of morals and principles. The second stage is the path of Sufism which is focus on the inner practices of worship and in third and fourth stage experiencing God within spiritual position of Sufism. Under Sufism Islam preaches by Sufis through good behaviour. Berry (2002)

Methodology is, A system of explicit rules and procedures on which research is based and against which claims for knowledge are evaluated. (Dixon & Marry, 1957). The major objective of methodology is to explain various tools and techniques employed for the collection, analysis and interpretation of data relating to research problem under investigation. The present study was conducted in district Jhang and Multistage sampling technique applied. The universe for the present study was the shrines of Sufi saints. V. RESULTS AND DISCUSSIONS

Analysis of data and interpretation of results are the most important steps in scientific research. Without these steps generalization and prediction cannot be achieved which is the target of scientific research. Generalization and conclusion are drawn on the basis of characteristics and attitudes of the respondents.

More efforts had been made during the government of "Hazret Umer Farooq" and ruled over 22 lac square kilometer of the world. He sent Muslim army in different regions of the word for conquering and for the preaching of Islam. Sufi orders were not established in the life of Holy Prophet (PBUH), it established after the demise of Holy Prophet (PBUH). Religious scholars who came in Subcontinent for the preaching of Islam established Sufi orders. Sufi orders can be traced in Shiea, Sunni and other religious groups. The word "Sufi" originate from the term of "Suf" which means "simple woolen cloaks." The real Sufis are basically mystics, people who followed a pious type of Islam and they believed that a direct and personal relation with "Allah can be achieved through meditation (Webster,2000). Sufis not only played an important role in the preaching of Islam in Eastern Asia but also in central Africa. In every corner of the world, Sufis are found. Sufis are the Muslims who represent the spiritual proportions of Islam. They are sometimes described as mystics of Islam. Basically a Sufi saint in any religion is equal to a Sufi saint in any other religion because they are motivated by the same Divine Source. Sufi doctrines contains many elements that go beyond the teachings of Prophet Muhammad (PBUH).Islam is an external structure in

which the individual exists while the internal search for enlightenment belongs to a realm of Sufi knowledge. Sufis became integrated and important central part of Islamic culture and society. In the context of Sufism, district Jhang is so rich and Sufi Saints played an important role in the preaching of Islam in Jhang. People of Jhang have great believe on the Sufi Saints, but at present , predecessors of these shrines are not true representative of Sufism and the teachings of their ancestors.
