A Conceptual Study on Reasons of Industrial Sickness- with Reference to Joinery Mills of the J&K Public Sector Undertakings

By Fayza Chowdhary

University of Jammu, India

Abstract - The researcher did an empirical study to find out the opinion of the employees of Jammu & Kashmir Industries Ltd, J&K for declaring it as a sick industry. The Researcher determined the reasons after taking the opinion from the employees of Jammu & Kashmir Industries Ltd, J&K. The objectives on which the researcher will conduct the study are: 1) To study the reasons due to which Jammu Kashmir industries Ltd. became sick industry. 2) Understanding the employees views about the most important reason for Jammu & Kashmir Industries Ltd, J&K becoming sick. 3) To frame a suitable revival strategy so as to protect the employment of the masses. and 4) Safeguard the state wealth & resources. The researcher tabulated the data and presented the data in the form of table and pie-chart. Thereafter the researcher discussed the reasons in detail. After studying the reason and analyzing them the researcher concluded that every reason given by the employee is responsible for declaring Jammu & Kashmir Industries Ltd. as sick industry.

Keywords : Jammu Kashmir Industries Ltd, Industrial Sickness, Financial Reasons and Technological Changes, revival, managerial inability, obsolete technology.

I. INTRODUCTION

Closures of Public Sector Undertakings and corporate failures resulting in bankruptcies have become a normal feature in the emerging market economies the world over (Slatter, 1984; Kharbanda and Stallworthy, 1985). Growing competition and the everchanging international economic environment often lead to high incidence of corporate failures in developed market economies. However, these economies have the resilience to absorb the economic disturbances brought about by the closure of industrial units. In recent years, industrial sickness in India has reached alarming proportions. An industrial unit is considered sick when its financial position is not satisfactory and it becomes worse year after year. It incurs losses and its capital reserves may be stretched out in course of time. When its current liabilities are more than current assets, the organization may not be in a position to pay its liabilities. The increasing trend in industrial sickness touching all types of units including small, medium and large-scale industrial sectors is of considerable concern. The problem is assuming titanic proportion and may have added repercussions in a country like India which

cannot afford unemployment and loss of production. J&K is a terror victim state since years and which lost its valuable resources event after event, but still the Government of the state chalked out many strategies to bring the life into the people of the state. J&K Industries Limited, a State Owned Company incorporated in October, 1963, having authorized share capital of Rs.20.00 Crores, was established. The main objective/functions of the company as per its Memorandum is to run, manufacture and administer the State Industrial Undertaking in a manner that would ensure their economical working. The Industry deals with the production of Processing and manufacturing of Textiles, Knitwear's / Joisery, Joinery and Furniture products as well as Silk (Plain and Printed) fabrics, besides Rosin and Turpentine. Arranging raw materials for production of all such products and marketing thereof.

II. CRITERIA FOR IDENTIFICATION OF SICK UNITS

The Reserve Bank of India identifies sick industrial units on the basis of a mix of criteria including continued cash losses, imbalances in the financial structure, and deterioration in liquidity. "A unit may be considered sick if it has incurred cash losses for one year and, in the judgment of the Bank (RBI), it is likely to continue to incur cash losses for the current year as well as the following year and the unit has an imbalance in its financial structure such as current ratio of less than 1:1 and worsening debt equity ratio" (RBI, 1978). Term lending institutions identify sickness on the following criteria:

- Continuous defaults in meeting four consecutive half yearly installments of interest or principal of institutional loans
- Continuous cash losses for a period of two years or continued erosion in the net worth by 50 per cent or more
- Mounting arrears on account of statutory or other liabilities for a period of one or two years (Bidani and Mitra, 1983).

The most stringent definition is given in the Sick Industrial Companies (Special Provisions) Act of 1985, which defined a sick unit as "An industrial company

Author : Department. Of Commerce, University of Jammu, India.

(being a company registered for not less than seven years), which has at the end of any financial year accumulated losses equal to or exceeding its entire net worth and has also suffered cash losses in such financial year and the financial year immediately preceding such financial year," About Jammu Kashmir Industries Limited ,J&K is a Company registered under the Companies Act, 1956 and was incorporated on the 03.10.1963. This Corporation is wholly owned J&K Government undertaking .The Shared Capital of the Corporation is Rs.20.00 Crores and paid up capital is Rs.16.26 Crores. This Corporation was set up with the main object of promoting local & traditional art of the state dealing with wood work, woolen, kashmiri silk ,kashmiri carved furniture, Rosin & Turpentine industry in the State of J&K. The Jammu & Kashmir Industries Ltd is presently engaged in.

a) Wood works

In Govt. Joinery Mills, Pampore Kashmir and Bari-Brahmana, Jammu our designers are also engaged in manufacturing of Khatumband ceiling Kashmir is known for its distinctive crafts, one of which is the woodcraft. History of woodcraft in Kashmir spans over ten centuries. Woodwork is not merely a functional craft it is decorative as well. It is believable that this distinctive craft has come from Iran as the Iran link in this craft still exists. Even today different types of Khatumband are known by Persian names, he observes. Khatumband has variety to look marvelous in design, JKI have different types of Khatumband design like Moje, Moje Lehar, Teen Bakshish, Chaar Bakshish, Charr Gul, Panch Murabba, Sheesh Gul, Dus Baraan, Dehwaz Deh Girid and many more.

Many buildings in and outside Kashmir can be seen having this unique type of ceiling. We have even designed the ceiling of Military Offices at Badambagh, Srinagar and Military Office in Ladakh as well. Visitors from different places visit at Govt. Joinery Mills, Pampore and come to know that the beautiful Khatumband ceiling which they see in house boats or in hotels is hand-made they come to us and offer is big assignments. It is also evident that these eminent craftsman not only design ceilings of houses, but ceilings of different shrines, mosques, houseboats and some hotels in Kashmir are the evident examples of the carving skill attained by these craftsmen. One will be amazed to see the beautiful Khatumband design at the holy shrine, Khankahi Moulla, in Srinagar. With the increase in modernization, people love to make their houses and offices more beautiful and attractive and Khatumband helps them to change their dreams into reality. Today people also like to design the walls of their houses or offices by Khatumband.

Besides, the Corporation also provides employment to the masses of the state. Already numbers of people working in the units of Jammu &

Kashmir Industries Ltd. have lost their employment due to the sickness of the units of these industries thus putting a burden on the Govt. of the state. Jammu & Kashmir Industries Ltd. is a Public Sector undertaking of the J&K Government. Therefore the researcher has selected Jammu & Kashmir Industries Ltd. for the study.

III. OBJECTIVES OF THE STUDY

The researcher will study about the reasons why Jammu & Kashmir Industries Ltd became sick industry. Therefore considering the study the researcher will work on the following objectives:-

1. To study the reasons due to which Jammu & Kashmir Industries Ltd became sick industry
2. Understanding the employee views about the most important reason for Jammu & Kashmir Industries Ltd. becoming sick.
3. To frame a suitable revival strategy so as to protect the employment of the masses .and
4. Safeguard the state wealth & resources.

IV. MATERIAL AND METHOD

a) Study Area

The area of conducting this study is Jammu & Kashmir Industries Ltd, J&K. The study is specific to Jammu & Kashmir Industries Ltd. The researchers will determine the reasons of sickness and will study them to meet out the objectives of the study.

b) Sample Method and Sample Size

As the study is based upon Jammu & Kashmir Industries Ltd. The sample size is small. The researchers will collect the data from 200 respondents who are the employees of Jammu & Kashmir Industries Ltd. India.

c) Data Collection Procedure

The data is collected by distributing the questionnaire among the 200 employees of the industry. The respondents from Jammu & Kashmir Industries Ltd. India in the state Jammu & Kashmir. And where the response rate was 85%. The researcher with the help of the selected sample size can know their opinion concerning the reasons of sickness of Jammu & Kashmir Industries Ltd. India.

d) Analytical Technique

Tabulated data was analyzed with the help of simple percentage to know the highly most influencing reason for sickness of Jammu & Kashmir Industries Ltd.

e) Stages of Industrial Sickness

An individual unit passes through several stages before it becomes sick. The knowledge about the various stages of sickness is very essential for taking corrective and appropriate measures in appropriate time. The different stages of sickness along with the determinants which identify these stages as per the

guidelines of Reserve Bank of India (RBI) are given below:-

Normal Unit - A normal unit is characterized by the efficient functioning of its functional areas like production, marketing, finance and personnel. In other words, a unit can be called healthy or in a normal state (NS) when it is earning profits, the current ratio is more than one, net worth is positive and debt-equity ratio is good.

Tending Towards Sickness- At this stage a unit shows certain initial aberration in any of its functional areas. In other words, the unit faces some environmental constraints. At this time, the unit is said to be tending towards sickness (TS). The distinctive features of this stage are decline in profit in the last year as compared to the previous year and loss estimated in the current year.

Incipient Sickness - The continuation of the deterioration in the functional areas of the unit, results in the actual setting in of industrial sickness. This stage is termed as incipient sickness (IS). At this stage, the unit incurs cash losses but imbalance in the financial structure may not be apparent.

From the research carried out it was found that the Jammu & Kashmir Industries Ltd have undergone all the above stages of industrial sickness. The researcher identified that there are various reasons that led the Jammu & Kashmir Industries Ltd to sickness and thereafter closure of many other units of the Jammu & Kashmir industries and now only 4 units of the industry are running that too on the verge of closure. The few of the problems that researcher identified after analyzing the questionnaires filled in by the employees of the industry:-

- Corporate planning failure.-The ill conceptualized plan, delay in action, inability to frame the modern, achievable goals, ill functional policies are responsible for the sickness of the industry.
- Production Problems-Underutilized plants, lack of product mix, defective production, availability of the

raw materials & other consumables is another reason for the sickness of the industry.

- Financial Barriers- Finance is the most important industry. To operate any industry finance is most one of the major reasons or Closure of any constraint in running any organization. It is also important consideration. Every industry needs finance to manage their day-to-day operations such as purchasing raw materials, salary pay outs, purchasing goods for office use etc. If finance is not arranged properly the industry may lead to closure. Therefore finance is most important reason responsible for sickness of any industry.
- Managerial Inability-Sometimes it is found that managers are not capable of managing the organizational activities. This may be due to various reasons such as inadequate work knowledge, uninteresting job profile or irrelevant education match with the job profile. Therefore if these sorts of experiments are done in the industry they may face the closure.
- Obsolete Technology-Technological changes also lead the industries to sickness, this happens when the proper adaptation of technology is not done. That is industry follows the old technology in production or any other related work. Therefore change in technology is also a considerable reason for industrial sickness.
- Marketing Related Problems-Produced goods or products are sold in the market. If the product is not marketed properly and supply is not proper there is possibility of customer switch to substitute product. If this issue of supply is not resolved quickly the industries may loose their customers and it can be the major reason for its sickness.
- Human Resource Problems: Lack of skilled labors ,deficiency among the technical staff, delay in the practicing of the modern HR Practices etc .If any of the implication is neglected it may lead to sickness.

Factors	Respond of Employees of Unit-II(Pampore)	Respond of Employees of Unit-IV(Bari Bramana)
Financial Factor	92%	94%
Production Factor	65%	57%
Managerial Inability	68%	85%
Obsolete Technology	54%	65%
Marketing Problems	75%	89%
Human Resource Problem	59%	76%
Corporate Planning Problem	78%	95%

V. FINDINGS AND CONCLUSIONS

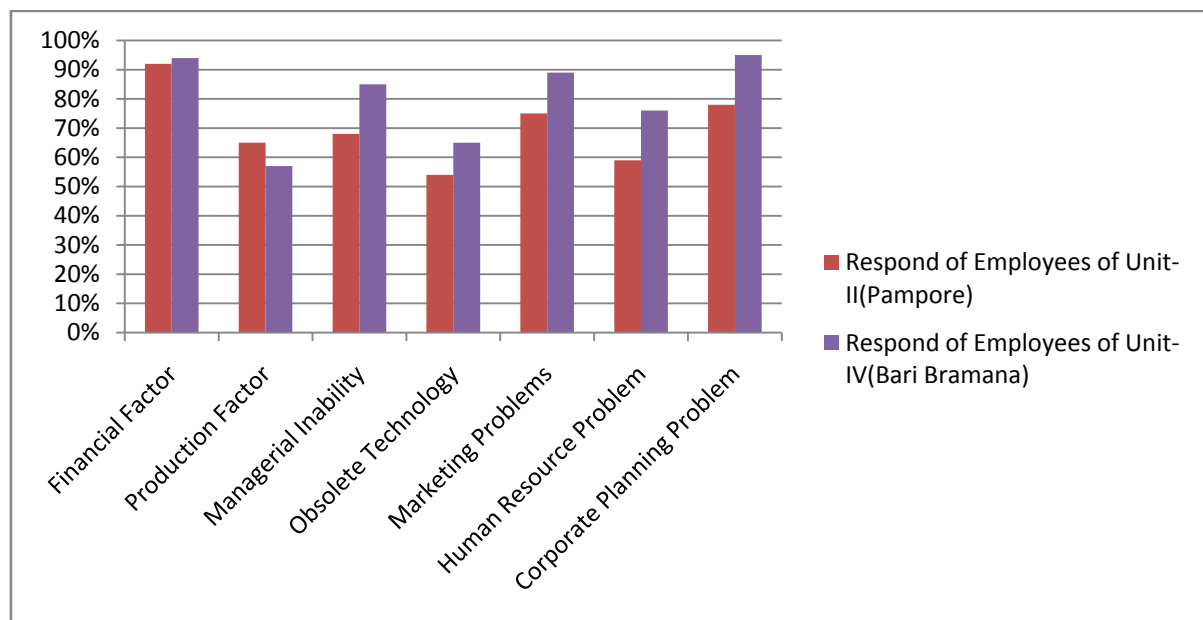

The researcher considered the major reasons that lead to industrial sickness. The researcher found that financial reasons are the most important reason considered by the respondents of industrial sickness and another chief reason for the sickness of the industry is the managerial inability i.e. not able to cope up with the dynamism occurring in the modern day markets. Rest factors which influence the sickness in the industry are Marketing problems and the corporate planning problems. However the impact of obsolete technology is least on these units in comparison to the other factors. The difference in the opinion exists between the employees of these units in some of the aspects like Marketing Problems, Managerial inability, HR Problems. Changes acts as an important reason for sickness. The researcher also concluded that there exist some variation between the views and opinion of employees of these units regarding the reason of sickness.

Thus from the all above it is very clear that the reason for industrial sickness in this PSU is mainly due to the internal failure thus a suitable revival strategy is to bring in the desired changes in the managerial ability & the Human Resources of the industry. So it is very clear that in all the four units the response is quite similar,

thus we need to adopt similar kind of revival strategies for all the units to come back again.

It was suggested that the EDIs of the state should actively participate in training of the employees of sick units periodically. The development corporations, financial institutions should make efforts in alarming the units becoming sick. The study is limited to single public sector undertakings residing in J&K only. The respondents seem to be unwilling due to lack of interest, negligence, communication problems. The element of subjectivity in interpretation cannot be ruled out in eliciting requisite information.

From the research carried out it was also revealed that the PSU's faces number of problems but the factor behind less sales of these units were related to marketing inefficiencies. The importance of innovative marketing strategies in bringing about successful turnarounds has been highlighted by several researchers. The marketing oriented business is customer focused, and generates and disseminates marketing intelligence that is widely used throughout the firms. Such firms are able to sense and respond to market force with greater precision than inward looking rivals so we can say a good action again is required by the managerial staff for the revival.

Questionnaire For Assessing The Industrial Sickness In Jammu & Kashmir Industries Ltd-A Conceptual Study

NOTE: You are requested to tick✓() the relevant box and fill in the relevant blanks. The information so collected would be used only for research purpose.

I. PERSONAL INFORMATION

- 1 Name & Address of the employee _____
- 2 Place of work _____
- 3 Designation: _____
- 4 Department : Production Finance HR Marketing Other
- 5 Gender : Male Female
- 6 Age: 1- Below 25 2- Between 25 to 45 3- 45 above
- 7 Educational qualification: Illiterate/ Primary/ Middle/ Secondary/ Graduate/ any other
8. Year of joining the organization

II. Other Information

SNO	STATEMENT	1	2	3	4	5
	Mission of the organization					
1	The unit has clear mission & objectives					
2	Adequate attention is paid by top management for the development of the unit					
3	The functional policy of the organization induces growth & development					
4	Change in financial policy is needed for the revival of the unit					

5	Units have taken sufficient steps to arrest sickness						
6	There is delay in the rehabilitation of the units						
7	Business objectives are driven by social objectives						
8	Revival of unit is possible only through privatization						
9	All turnaround strategies have failed to revive the unit						
10	Objectives of the unit are not communicated at operating level						
11	Innovative technology can gain market share quickly						
12	Change in market-mix is needed for the revival of the unit						
14	Change in the work force would make the unit viable						
15	The unit has become sick due to its unclear mission						
Corporate Planning & Control							
1	The site of the unit is not satisfactory						
2	The unit faces difficulties in procuring raw material						
3	Machines & technology is out dated						
4	The unit faces difficulties/delay in tying up financial arrangements with other financial institutions or banks						
5	The unit faces lack of government support						
6	The unit faces delay in disbursement of assistance due to non- compliance of the major terms and conditions of the loan agreement						
7	The unit requires changes in certain project concepts due to subsequent detailed advice received from collaborators/ consultants						
8	Price escalation adversely effects cost of product & its market						
10	Delay in getting power connection, water connection, permission of concerned authorities to discharge effluents, etc are the cause of sickness						
11	Stagnant price of the product is the reason for the less turnover of the unit						
12	The unit formulates outdated functional management strategies						
13	There is inadequate R&D work in the unit						
14	Lack of co-ordination between the unit and Govt. Departments is one of the causes of the sickness in the unit						
15	A well designed corporate planning would revive the unit						
16	The unit has become sick due to lack of corporate planning & control						
Production Problems							
1	The unit faces lack of infrastructural facilities like power , water , transport etc.						
2	Lack of maintenance leads to frequent breakdown of machines in the unit.						
3	Undue hike in raw materials , consumables, power, etc. adversely affects production						
4	Improper choice of raw material/raw material-source, choice of production process etc. affects production capabilities of the unit						
5	The decline in production is due to defects/under performance of plant and machinery, defects in production process etc						
6	The unit is unable to produce quality product						
7	Lack of proper planning of product mix and lack of co-ordination between production and marketing wing is leading to idle inventory						
8	The inability to meet market demand/tap foreign market causes sickness						
9	Increased capacity utilization (improved plant efficiency) is a good turnaround						

	strategy						
10	Products are not as per market specifications						
11	Poor product quality & production processes are causing sickness in the unit						
Marketing Problems							
1	The units are losing the target market due to better substitutes						
2	Entry of many new manufacturers leading to cut-throat competition for products						
3	The products of the unit are not promoted as required						
4	Poor delivery schedules and lack of proper distribution system puts the wrong image of the unit on the buyers						
5	There is minimal communication between marketing and manufacturing wing of the unit						
6	The target market of the unit is smaller						
7	The products of the unit lacks correct costing and correct pricing system						
8	The quality of the products is not meeting the standards/customer expectation						
9	The unit has failed to satisfy customer's needs						
11	Product innovation and new product development is a good marketing turnaround						
12	Exhibitions, trade fair can help in the promotion of the unit						
13	Better forecasting of demand is the prime requirement of the unit						
14	Better customer relationship should be gained to avert sickness						
15	Deleting unprofitable product line can reduce the cost of the production of the unit						
16	Products should be promoted through print and non print media						
17	Channel of distribution should be intensive to reach inert markets						
18	Sales promotion should be carried out to attract new and retain old customers						
19	Improved product, price, promotion and channel of distribution could check sickness in the units						
20	Lacks of proper marketing strategies have led to the unit sickness.						
Financial Problems							
1	Wages and salaries are not regularly paid to the employees						
2	Over staffing causes financial problems on the unit						
3	Unit is unable to reach the projected figures						
4	The finance wing of the unit needs training & appraisal						
5	Misappropriation of funds is the major cause of sickness						
6	Unit lacks regular auditing of the books of accounts						
7	The credit sale has reached to disproportionately high level due to the liberal credit policy of the unit						
8	Regular over draft facility is not provided by financial institution						
9	Accounting procedure does not reveal correct financial position of the unit						
10	The unit delays in the finalization of the accounts						
11	Working capital is not adequate to meet day to day expenses						
12	Conversion of short-term loans in to long-term loans may reduce the temporary burden of the unit						
14	The banks should sanction additional loan to meet the additional capital expenditure of the unit						

15	Enhancement of working capital limits is a good financial strategy for the turnaround					
16	Selling of non-core business is a viable decision to remove the sickness of the unit					
17	Financial restructuring coupled with cost cutting can revive the unit					
18	The unit requires technical collaboration for international excellence					
19	The cash inflows are irregular in nature					
20	Values of the assets of the unit are decreasing					
21	The units are getting timely subsidies from govt.					
22	ACP/APP varies with the credit policy of the unit					
23	Process improvement and modernization can make unit viable					
24	Financial barriers are responsible for the sickness of the unit					
Human Resource Problem						
1	The unit faces dissension within the management					
2	Poor industrial relationship is found within the unit					
3	The unit faces lack of coordination and control					
4	Non- availability of skilled man- power is the reason for the eroded quality of the product					
5	The unit faces disguised unemployment					
6	The periodical trainings to the staff of the unit are a viable turnaround strategy					
7	Traditional method of getting work done is one of the reasons of the failure of the products of the unit					
8	Absence in the unity of command due to dispute/difference of opinion among the Directors					
9	Absence of motivation among the man power of the unit promotes inefficiency					
10	Lack of manpower planning exists in the unit					
11	By agreeing to induct professionals as directors at various functional areas like technical /finance /marketing /research and development would strengthen the existing management					
12	The unit should outsource HR from outside to gain professionalism in manufacturing operations					
13	The reason for the sickness is HR related					
14	Flattened type organization structure is a good turnaround HR strategy
