Case Study on Front Office Staff Service Quality Improvement as New Trends for Best Customer Satisfaction in Hotel Radisson Blu Kaushambi, Ghaziabad

By Varun Sharma, Rohit Jaswal & Prof. (Dr.) Rajiv Mishra

Galgotias University

Abstract- Customer satisfaction is defined as how customers are satisfied with a company's products, services, and capabilities. Customer satisfaction information, including surveys that help the department to find out the actual problem and start working on it overall at the end it increases the overall value of the hotel.

The hospitality industry is a broad industry. It includes hotels, tourism agencies, restaurants and bars. You will find hospitality people everywhere that’s the beauty of this sector. In this project I got to know that how hotel is maintaining guest experience in this pandemic and building the good value in the market for my research project.

I also conduct an online survey which shows that how employees of Radisson Blu Kaushambi is doing their best to maintain the guest expectations and how much they are satisfied working in this situation.

Keywords: guest satisfaction, covid-19, front office, guest Feedback, Hospitality.

Classification: DDC Code: 658.72 LCC Code: HD38.5
A Case Study on Front Office Staff Service Quality Improvement as New Trends for Best Customer Satisfaction in Hotel Radisson Blu Kaushambi, Ghaziabad

I. Introduction

The Indian tourism and hospitality industry are interlinked to each other they worked side by side. India is a country which gives you experiences of multiculture with rich heritage. People travel to india to enjoy this myriad attractions and hospitality enhances the experiences of the travellers. Where people served the rich culture of the india to the travellers

I have done my industrial training from 5-star property i.e., Crowne plaza, Greater Noida, Uttar Pradesh Including the core departments and now I am working in front office department As a GSA at Radisson bluKaushambi, delhi NCR

I came across many new ideas when I was working in front office department and got know how records is being maintained in excel sheets, montoring of review websites, handling guest complaints, service recovery for any incidentals these things which I have observed.

II. Objectives

- To study and analyses the working situation in front office department post covid
- To findout the loopholes in the department which degrading the guest satisfaction
- Analyses of the service recovery on any incidentals.

III. Literature Review

- After going through this research from Worsfold, K., Fisher, R., McPhail, R., Francis, M., & Thomas, A. (2016), I got know that According to the Worsfold the job statisfaction is directly proportionate to the guest satisfaction and how we can deal with that situation. If employees are satisfied of an department then and only productivity can be increased.
- In this research Kim, T. G., Lee, J. H., & Law, R. (2008), we got know that how IT department is so helpful to get an extraction of all feedbacks and how IT helps to capture the guest feedbacks. According to the Kim IT connects the every department with each other so we can easily transfer the information through system softwares.
- From this review of Foo, L. P., Chin, M. Y., Tan, K. L., & Phuah, K. T. (2021), we got know that how different sector got affected by the COVID-19 and how they deal with that to survive in the market. Post covid situations are different as compared to pre covid in this they differentiate both the situation and tells us how hospitality sector got affected and what all measures they takes to overcome and now hospitality industry is again starting contributing good amount of GDP.

IV. Methodology

This Paper is based upon the both qualitative and quantitative methods of research, the sample papers and the other information which was gathered...
through the medium of online media that in the google forms.

For this paper I have personally taken reviews from more than 50 people. I have also met people personally to gather information for the same. The people whom I have taken my reviews from were in age category of 18-50 years that included the permanent employees as well as the trainees that were present in the hotel Radisson Blu Kaushambi, Ghaziabad. Based on my survey some bar charts and some pie charts have been generated after conducting the survey. The information that I gathered through the medium sources of my research are almost the accurate and have been checked by the hotel experts and some other people working in the same industry.

Also, apart from primary data I have done the literature reviews from published research papers, published journals, book chapters along with few articles from magazines, google search and some power point presentations available for reading on digital media as secondary data collection.

V. Graphical Presentation

Research analysis data and the screenshots of the responses collected

a) Covid-19 protocols are becoming an issue

Post covid there are lot of issue in providing an upscaling in guest service as we can clearly see in this Pie Chart There Are 53% people who strongly agree that protocols such as wearing masks and using sanitizer are somehow annoying the guest overall satisfaction.

b) Training of Staff

This Pie Chart clearly states that most of the people agree that training is required for the staff on the new norms but if you look at different side there are people who thinks that training is not required staff can still Runs the operation smoothly

4. Are salary plays an important part in an overall behaviour of the staff?

As we all know that Hospitality Industry is 24 hour Operational industry Which Led the staff to work as per the requirement of the operation so sometimes the working hours got extend which affects the courtesy nature of staff

![Fig. 1: Protocols of Covid 19](image1)

![Fig. 2: Staff Training Pie chart](image2)
d) Salary of an employee
According to the report we got to know that somehow Salary Plays An Important Role In the Behaviour of the Staff Sometimes They Feel demotivated when they working more as per the requirement of the operation.

2. The front office staff needs to be trained as per new trends and techniques to provide the best customer service?

3. Is continuous long working hours do effect the staff courtesy nature?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

![Pie chart showing the responses to the question about long working hours](image)

4. Covid-19 Protocols Affecting the guest Satisfaction
Wearing a mask is the biggest concern these days, without a mask a person should not be going out of his house. I have researched on this and the results came to be good, rest I have presented this in the form of pie chart.

5. In your opinion use of COVID-19 protocols are affecting the overall satisfaction of the guest positively?

- Strongly Agree
- Agree
- Neutral
- Disagree
- Strongly Disagree

![Pie chart showing the responses to the question about COVID-19 protocols](image)

6. Front office staff rating
We asked people as per your experience please rate the front office staff service as per the hotel standards we got some amazing results but the improvement is always needed no one can be perfect in this world.

VI. Conclusion

After conducting this research, we got to know what actually staff needs and where the management is lacking. This research is important because Radisson Blu Kaushambi is not doing well since after this pandemic breakdown, we need a ground report from staff as well as from guests so we can actually find out that where we are lacking what we need to update in our system. No one asked about the employee how they are working how they are managing themselves in this situation.

After the pandemic, the hospitality industry faces a lot of challenges but still managed to survive in this pandemic and adopted some new plans to overcome this situation. There are a lot of new trends and technology which was implemented after this post-covid and employees learn a lot of new things in this pandemic.

Some of the examples of new trends are contactless checkins and checkouts and chat bots for FAQ’s etc.

Hospitality industry is still reviving itself from this outbreak and getting back on track. This outbreak helps a lot of people to learn a lot of things and we are hoping that hospitality industry will get evolved with lots of strength, new trends, and technology.
