Can We Go against the Permanent Disorder (Entropy) Increase with Aging and Rejuvenate?

By Prof. Maria Kuman

Holistic Research Institute

Editorial- In 2011, Acad. Trofimov and Druzhinin published in Russia their book: "Informational Programs – Perspectives of the Ecology and Medicine of the 21st Century". The book delivers the results of their long-term studies of the importance of hydrogen (they call them solar protons). They claim that basic reason for our aging is the lack of enough hydrogen to form the hydrogen bonds and hydrogen is pooled from nucleotides, like DNA, proteins, and pigments. This leads to aging of the body and decreased energy – all caused by the decreased amount of hydrogen in the body. The book delivers information about the created by them equipment TRODR-1 for treatment of water. It increases the amount of solar protons (hydrogen) in the water, which slows down the process of aging and restores the harmonic functioning of the organs.

This is a revolutionary new outlook to the process of aging of living creatures and the amazing thing is that both the living creatures and the stars age because of the lack of not enough hydrogen. Is the lack of enough hydrogen at the bottom of the constant increase of the disorder (entropy) with time, which means winning of disorder over the order? The energy of the new stars comes from burning hydrogen and transforming it into helium. The stars age as the amount of hydrogen decreases. The binary stars are two stars orbiting around each other - one of the stars is an old star sucking energy from the poles of a younger star. This continues until both stars have the same energy and shine with the same intensity. Is the old star sucking hydrogen from the younger star? Is this a way the old stars found to rejuvenate themselves?

In 2011, Acad. Trofimov and Druzhinin published in Russia their book: "Informational Programs – Perspectives of the Ecology and Medicine of the 21st Century". The book delivers the results of their long-term studies of the importance of hydrogen (they call them solar protons). They claim that basic reason for our aging is the lack of enough hydrogen to form the hydrogen bonds and hydrogen is pooled from nucleotides, like DNA, proteins, and pigments. This leads to aging of the body and decreased energy – all caused by the decreased amount of hydrogen in the body. The book delivers information about the created by them equipment TRODR-1 for treatment of water. It increases the amount of solar protons (hydrogen) in the water, which slows down the process of aging and restores the harmonic functioning of the organs.

This is a revolutionary new outlook to the process of aging of living creatures and the amazing thing is that both the living creatures and the stars age because of the lack of not enough hydrogen. Is the lack of enough hydrogen at the bottom of the constant increase of the disorder (entropy) with time, which means winning of disorder over the order? The energy of the new stars comes from burning hydrogen and transforming it into helium. The stars age as the amount of hydrogen decreases. The binary stars are two stars orbiting around each other - one of the stars is an old star sucking energy from the poles of a younger star. This continues until both stars have the same energy and shine with the same intensity. Is the old star sucking hydrogen from the younger star? Is this a way the old stars found to rejuvenate themselves?

Interestingly enough, if we draw the periodic table of the chemical elements of Mendeleev as a spiral, the hydrogen (the simplest element) will be at the bottom of the spiral. Is this what made the hydrogen so vitally important and made the lack of enough of it reason for aging of stars, as well as living beings? Another reason for people's aging is the lack of vitamins and minerals in our food. The Noble Prize winner Linus Pauling said that in the whole history of humanity on Earth there was no period of time like ours – with so much food with so little nutritional value. Our food, being

raised with artificial fertilizers does not have the vitamins and minerals it should have.

The Institute of Bioregulation and Gerontology in St. Petersburg, Russia, confirmed the findings of Dr. Kanchzhen that another reason for aging is not enough basic amino acids. When they added to the vitamins and minerals basic amino acids the results were staggering – the people when taking them looked and felt much younger. The vitamins, minerals, and amino acid combination was called Tsitamins in the name of Dr. Jiang Kanchzhen. Dr. Kanchzhen was born in China and he did research in China, which was very much ahead of his time. As far back as in 1961, Dr. Kanchzhen built a Biotron, which was projecting the biofield of one animal on microwave radiation and then transmitting it to the biofield of another animal. By projecting the biofield of ducks on chickens, he was getting hybrids like chicken with duck's beaks. Mao tze Dun disliked what Dr. Kanchzhen was doing because it was against the communist materialism and Kanchzhen got into trouble.

Dr. Kanchzhen immigrated to Russia in 1971, but there was no understanding and appreciation of what he was doing in Russia either. He was working as an acupuncturist for living and doing the experiments with his Biotron at home (but at least the Russians were not hostile). He published a book: "Theory of Field's Control – Microwave Transmitter of Biological Information", which describes his experimental findings that DNA exists in two forms – material DNA (which is the passive form) and field DNA (which is the active form). While the material form of DNA preserves the genetic code and assures the stability of body functioning, the field-form of DNA is capable to accept information from the environment and change the DNA to adapt to the new environment.

This agrees with my statement that everything material is a material body and nonlinear electromagnetic field (NEMF) [2]. Based on his own experiments, Acad. Garyaev at much later time claimed that the genome seems to be quasi-conscious [1]. Dr. Kanchzhen found that microwaves with frequency 11 GHz could even change the material DNA. The Russians found that microwaves with frequency 1 – 2 GHz is the zone, in which viruses manifest themselves in our aura, which according to my almost 40 years of study is nonlinear electromagnetic field (NEMF) [3]. Since the

Author: Ph.D, Holistic Research Institute, 1414 Barcelona Dr., Knoxville, TN 37923, USA. e-mail: holisticre@mariakuman.com

frequency of the 5G fast internet is 1 – 2 GHz, with the 5G technology we are entering a dangerous zone (!).

Since I found [4] that our NEMF is emotional and we say we are in high Spirit when we experience positive emotions (or just think positively) and we say we are in low Spirit when we experience negative emotions (or just think negatively), the aura we see is our Spirit. (Then I found that the ancient Jewish Kabala for high priests was teaching that the aura is our Spirit). The Spirit (seen as aura) is donut shape NEMF, which surrounds the body and protects the material body as a protective shield – viruses can attack the body only if this NEMF field allows them to reach the body. For that reason, the 5G fast internet is dangerous because it disturbs the wholeness of our protective shield seen as aura and called Spirit. So, if we are lucky enough to survive the Pandemic, the next technology 6G fast internet with frequency 11 GHz will change our DNA.

In 1990s, Dr. Kanchzhen was finally able to patent in Russia his findings. In 1992 he got a patent for changing hereditary information with transmission of bioinformation. In 1996 he got patent for his rejuvenation experiments. In 1997 he finally got patent for his Biotron Jiang, which he built in 1961. (This means he got the patent for his Biotron 36 years after he built it). This is the prize he paid for being ahead of his time. I had to wait 40 years to see my article published explaining full intuitive creativity as a synchronous work at the same level of over-excitement of the digital computer of our Conscious and the Quantum Computer of our Subconscious [5], [6]. It was published after we started making Quantum Computers.

The same was the destiny of my article explaining partial intuitive creativity as a transfer of solutions from the Quantum Computer in the Subconscious to the Digital Computer in our Conscious through the barrier between them – it is a quantum transfer through tunneling the barrier. It got published after we started making Quantum Computers. I was not acquainted with the work of Dr. Kanchzhen until recently, but I have articles published that the aura's NEMF is our Spirit (weak informational field), which is magnetically attached to the NEMF of our material body... and this is true for all living beings (plants, animals, and humans) [7].

I have also published the article [7], which explains the role of our NEMF in the adaptation to new environment. But let's go back to what Dr. Kanchzhen did. After the Institute of Bioregulation and Gerontology in St. Petersburg confirmed the rejuvenation effect of Dr. Jiang Kanchzhen combination of vitamins, minerals, and aminoacids (patent of 1996), Russia started making them and exporting them under the name Tsitamins in: Canada, the UK, Switzerland, Japan, etc. It seems that the time has come to appreciate what Dr. Kanchzhen found so many years ago.
